HOSPITAL MORBIDITY STATISTICS

Based on the experience of
provincial hospital insurance
plans in Canada
January 1-December 31, 1962

Department of National Health
and Welfare

Ottawa

December 1964.

968185

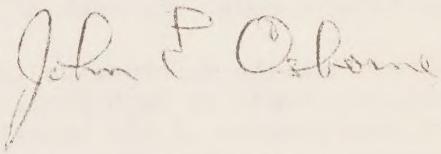

FOREWORD

The tables in this bulletin have been compiled and consolidated from data prepared by Provincial and Territorial Hospital Insurance Plans for the year 1962. In some instances, the data have already been published, in full or in part, by the provinces in their Annual Reports; in others, the data have been submitted directly to this Department in unpublished form.

Data for the tables are obtained from hospital admission-separation forms. The contents and format of the tables follow the uniform outline for hospital morbidity statistics recommended by the Working Party on Admission-Separation Forms and Related Matters, and approved by the Advisory Committee on Hospital Insurance and Diagnostic Services in 1961. Some provinces did not provide the information for certain tables, as indicated in the various footnotes.

Separation rates and patient-day rates are based on population estimates produced by the Dominion Bureau of Statistics for the year 1962.

The bulletin has been prepared by Mr. Archie McKenzie of the Biostatistics Section of the Research and Statistics Division; the tables have been prepared and rates calculated by Mr. Jacques Bazinet.

John E. Osborne, Director,
Research and Statistics Division.

INTRODUCTION

The information in this report is contained in tables covering the following aspects of hospitalization in Canada:

1. Summary of separations and the patient-days of these separations by the agency responsible for payment of hospitalization.
2. Separations and patient-days by sex and age groups, separation rates and patient-day rates per 1,000 population, average length of stay and the percentage distributions of separations and patient-days by province.
3. Separations and patient-days of these separations by age group and length of stay in hospital, by province.
4. Separations and patient-days, separation rates and patient-day rates per 100,000 population, and average length of stay, by sex and age group, by the Canadian List of 98 diagnoses, for Canada.
5. Separations, patient-days, average length of stay, separation rates and patient-day rates per 1,000 population, by age group for the ten most common operations, by province.
6. Separations, and separation rates per 100,000 population for the twenty-five most common operations, by province.
7. Separations and patient-days for the 75 categories in the "Temporary List of Operations and Treatments", by province.
8. Separations and patient-days for the categories in a special list of infant diagnoses, for newborn infants and for infants under one year of age, by province.

When using the information in this bulletin, certain reservations should be kept in mind. The data are not meant to be a true measure of the actual amount of illness in each province or in Canada. They reflect only the morbidity experience of persons admitted to hospitals. No attempt is made to include sick persons who are treated at home, in a physician's office, or in out-patient clinics.

It must be recognized that the counts of cases and patient-days apply to "separations". A separation is defined as a "discharge or death" occurring during the year. No account has been taken of multiple separations for the same illness or multiple admissions of the same individual for different illnesses. With patients moved from one hospital to another or with recurring attacks of the same illness being counted independently for each episode in hospital, there may be some tendency for the caseload to be overestimated. It is not possible to determine from these data how much any individual may contribute to the total caseload of illnesses. Although these distinctions are of little importance from the point of view of those treating the sick person, they have definite interest for those concerned with hospital administration and planning of community services.

Hospital caseloads will tend to reflect those types of disease conditions which receive some benefit from hospital facilities and services, with particular emphasis on surgery and intensive medical treatment. Examples of such conditions are acute appendicitis and coronary attacks. Alternatively, illnesses which can be treated at

home or in the physician's office are less likely to appear in hospital morbidity statistics. Examples of such conditions are upper respiratory illnesses and rheumatism. Hospitalization data may therefore be a fair indicator of morbidity in some conditions but a poor indicator in others.

The data represent hospital utilization, or the amount of care provided. The provinces differ somewhat in their arrangements to provide this care, such as in the number of hospital beds available in relation to provincial population, the number of chronic facilities available and the extent to which they are included in the hospital insurance program. Alternative forms of care, such as the care provided by nursing homes will vary from province to province. Comparisons of the effect of these factors on hospital utilization are beyond the scope of this publication.

PERCENTAGE DISTRIBUTION OF PATIENT-DAYS

NOTES :- TABLE 2

BASICALLY, TABLE 2 PRESENTS DATA ON PROVINCIAL PLAN IN-PATIENTS, INCLUDING OUT-OF-PROVINCE HOSPITALIZATION, WITH THE FOLLOWING EXCEPTIONS:-

- a. Newfoundland:- Includes separations and days not the responsibility of the Provincial Plan.
- b. Prince Edward Island:- Out-of-province separations were 440 and patient-days 7,496. Of these an estimated 322 separations and 5,485 patient-days were included in Table 2. In addition, Table 2 includes separations who were the responsibility of the Department of Veterans Affairs and Workmen's Compensation Boards. Includes uninsured residents but excludes non-residents.
- c. Nova Scotia:- Excludes out-of-province hospitalization.
- d. New Brunswick:- Includes separations and days not the responsibility of the Provincial Plan, but excludes non-residents.
- e. Quebec:- Includes separations and days not the responsibility of the Provincial Plan. Includes all separations and days that were a Federal responsibility, rather than Department of Veterans Affairs only. Includes non-residents.
- f. Ontario:- Includes separations and days not the responsibility of the Provincial Plan.
- g. Manitoba:- Includes separations and days not the responsibility of the Provincial Plan. Excludes non-residents.
- h. Saskatchewan:- Excludes Provincial Plan separations from geriatric hospitals at Regina, Saskatoon and Melfort.
- i. Alberta:- Includes separations and days not the responsibility of the Provincial Plan. Excludes non-residents. Includes separations and days which were the responsibility of other departments of the Federal Government, as well as the Department of Veterans Affairs.
- j. British Columbia:- Excludes out-of-province separations and days which were the responsibility of the Provincial Plan.
- k. Yukon:- Excludes out-of-province separations and days which were the responsibility of the Yukon Hospital Insurance Service. Includes separations and days which were not the responsibility of the Territorial Plan. Includes all separations and days which were the responsibility of the Federal Government. Includes non-residents.
- l. Northwest Territories:- Includes only Territorial Plan separations and days.

NOTES: TABLE 6

Hospitalized patients may be classified as PLAN or NON-PLAN according to the responsibility for payment of hospitalization costs. Basically, Table 6 presents data from seven provinces and two territories concerning in-patients separated from general hospitals and chronic hospitals (including patients hospitalized out-of-province) who were insured under a provincial or territorial hospital insurance plan. However, Table 6 should not be considered as an exact representation of the combined provincial-plan experience of these provinces and territories, because of the inclusion in some provinces of NON-PLAN separations and patient-days and exclusion in other provinces of certain categories of PLAN separations and patient-days. Thus, the provinces and territories have added to, or deleted from, the basic PLAN data as follows:

1. PRINCE EDWARD ISLAND:- (a) of the 440 separations and 7,496 patient-days classified as out-of-province hospitalization, approximately 322 separations and 5,485 patient-days were included in Table 6. (b) Also included: (i) NON-PLAN patients who were the responsibility of the Department of Veterans Affairs and the Workmen's Compensation Board (ii) uninsured residents. (c) Excluded: Non-residents.
2. QUEBEC:- Included: PLAN and NON-PLAN patients, from general hospitals and chronic hospitals. Included in the NON-PLAN group were patients who were the responsibility of the Federal Government and the Workmen's Compensation Board, and non-residents.
3. ONTARIO:- Included (i) PLAN and NON-PLAN patients from general hospitals, chronic hospitals, and chronic units of general hospitals; (ii) patients, from other provinces, who were hospitalized in Ontario.
4. MANITOBA:- Included: PLAN and NON-PLAN patients (Manitoba residents) from general hospitals and extended treatment hospitals. Included in the NON-PLAN group were Department of Veteran's Affairs patients, Workmen's Compensation Board patients, and uninsured residents. Excluded: non-residents.
5. SASKATCHEWAN:- Included: PLAN patients from geriatric hospitals in Regina, Saskatoon and Melfort.
6. ALBERTA:- Included: PLAN and NON-PLAN patients (Alberta residents) from general hospitals, auxiliary hospitals, and contract hospitals. NON-PLAN patients included (i) those who were the responsibility of the Federal Government and the Workmen's Compensation Board, (ii) uninsured residents. Excluded: non-residents.
7. BRITISH COLUMBIA:- Included: PLAN patients hospitalized in the province. Excluded: PLAN patients hospitalized outside the province.
8. YUKON:- Included: PLAN and NON-PLAN patients hospitalized in the Yukon. NON-PLAN patients included (i) those who were the responsibility of the Federal Government and the Workmen's Compensation Board (ii) non-residents. Excluded: PLAN patients hospitalized outside the Yukon.
9. NORTHWEST TERRITORIES:- Included: PLAN patients.

TABLE 7(a) - NUMBER OF SEPARATIONS, BOTH SEXES AND ALL AGES, FOR THE TEN MOST COMMON DIAGNOSES, FOR EIGHT PROVINCES AND TWO TERRITORIES, 1962.

All the reporting provinces include Provincial Plan in-patients in Table 7, as well as out-of-province hospitalization of Provincial Plan separations, with the following additions or exceptions:-

?P.E.I.: - Includes most of Provincial Plan separations hospitalized out-of-province.
Also includes "non-plan" separations, but excludes "non-residents" separations.

- Provincial Plan separations hospitalized in the province
- Includes "non-plan" separations
- Includes "non-plan" separations, but excludes separations from chronic hospitals or chronic units in general hospitals
- Includes "non-plan" separations, but excludes "non-resident" separations
- Excludes Provincial Plan separations from chronic hospitals in Regina, Saskatoon and Melfort.
- Includes "non-plan" separations, but excludes "non-resident" separations
- Excludes Provincial Plan separations hospitalized out-of-province
- Excludes Territorial Plan separations hospitalized out-of-province,

N.W.T.s - Territorial Plan separations but includes non-plan separations including out-of-territory hospitalization

TABLE 7(b) - RANK ORDER OF SEPARATIONS, BOTH SEXES AND ALL AGES, FOR THE TEN MOST COMMON DIAGNOSES,
FOR EIGHT PROVINCES AND TWO TERRITORIES, 1962

TABLE 7(c) - PATIENT DAYS CORRESPONDING TO THE TOP TEN DIAGNOSES BASED ON SEPARATIONS, BOTH SEXES AND ALL AGES, FOR EIGHT PROVINCES AND TWO TERRITORIES

TABLE 10 - (Cont'd)

- B. The "Residual - Other Infants" category has been calculated uniformly, as follows:

 - (a) Separations for all diagnoses (1-98) for the "Under 1" age group in Table 6, less the separations for diagnoses listed in Table 10.

C. Quebec, Manitoba and Alberta each include patients who are the responsibility of their Provincial Plans, and patients who are not the responsibility of their Provincial Plans.
